

## Multi-Factor Authentication And Access Management. The Easy Way.

Secure employee access to corporate networks and cloud applications  
for any on-premises or hybrid Active Directory environment, from anywhere.

- **Secure** all employee access, whether privileged, remote or cloud
- **Streamline** session management
- **Review** accurate logon logoff forensics
- **Manage** working hours
- **Stop** security breaches
- **Meet** compliance & insurance requirements, like: HIPAA, PCI DSS, ISO 27001, NIST 800-53...

### Access Security **Far Beyond** Native Windows Features

- 1 Two-Factor Authentication (2FA)**  
Verify user identity across connection types, and customize when to ask for 2FA.
- 2 Single Sign-On**  
Provide federated authentication to cloud apps with on-premise Active Directory (AD) identities.
- 3 Contextual Access Policies and Restrictions**  
Limit concurrent sessions and restrict logons by time, location, and session type.
- 4 Session Management**  
Get real-time monitoring and immediate alerts of suspicious login activity.

### The **Go-To Access Management Partner** for On-Premises and Hybrid AD Environments

Easy to Use

Non-Disruptive

Easily Adopted

Cost Effective
